

A Journey from I to Us.
Un voyage du Je au Nous.
การเดินทางจากฉันถึงเรา
Un viaje del yo a nosotros.
Un viaggio dall'io a noi.
从我到我们的旅程

As a French Mediterranean artist, I take a contemporary look at the meaning of reality, at the moment to the point when permanence and impermanence merge.

Born in Toulon-France, father of two children, I have been living in South Corsica for more than 15 years, and settle myself in South East Asia, but also travel around the 5 continents.

After a successful experience in the world of management, my passion for the arts has grown steadily since my childhood.

My own self-searching has led me to underline the importance of differentiating ourselves in order to join forces and act together for a better world

Traveling around the world led me to the following observation:

Humanity is us. Let's become the builders of hope.

My artistic work, which I refer to as "Synoptic Art," involves transforming simple ideas into organized representations through figurative forms. The artworks revolve around various themes that encompass aspects such as humanity, duality, the paradox of the moment, the sixth sense... in a constant search for balance and common sense. I approach the world with a perspective that goes beyond conventions and received ideas. My focus lies more on the expression of the representation rather than the use of colors. My aim is to enable the viewer to go beyond preconceived and conceptual notions. I strive to offer a deeper and enriching visual experience.

Each theme I consider is developed in a series of several pieces, made in a range of multiple different materials and media, depending on the theme.

Each theme is also a source of further inspiration, always oriented towards humanity and our role in the present.

Do not confine yourself to perceiving differences, seek for union.

We are Humanity

So

Let us build Hope Together

A symbolic process

An intuitive and symbolic artistic expression inherent to form, making certain complex notions more accessible. A journey into the depths of conscious and unconscious personality, providing avenues for reflection to better understand our inner path.

Humanity only exists through us. Humanity becomes what we make of it. We are humanity... Let's become the builders of hope. Humanity is a vessel, a ship without anchor, and we are the sail, without whom nothing moves forward. Humanity only exists through us. Humanity becomes what we make of it. Nurturing common sense is nurturing humanity. Free, useful, and responsible, let us guide humanity to where the wind is born... Difference is a natural resource, accepting and tolerating it is a springboard for our personal development. Let's become the 'BUILDERS OF HOPE'. 'DIFFERENT-EQUAL-DIFFERENT' Let's remain open and tolerant.

2023. MASTER SERIES Bronze sculptures

I create Digigraphies What are Digigraphies?

Digigraphy® Explained

Digigraphy is the modern and computerized version of Lithography. It is a process of producing or reproducing works of art. This is a limited series print, numbered and signed by the hand of the artist.

Each Digigraphy is marked with a stamp and accompanied by a certificate of authenticity. The Digigraphy is made exclusively on Epson Stylus Pro printers with Epson UltraChrome or UltraChrome K3 inks.

The printing is done on smooth, textured, glossy or matte high-end art thick papers such as Epson Aquarelle, Somerset Velvet, Hahnemühle or Canson as well as on approved canvas canvases.

Digigraphies performed under these conditions are guaranteed for a minimum of 70 years under normal indoor exposure conditions.

Digigraphy is not reserved for a type of art or for artists who master computers. It is a new technological means, an evolution in tools that offers new horizons. For artists, this label makes it possible to produce quality limited series without having to print everything at one time. It is indeed possible to make prints as and when.

To value each print, artists must decide to limit the number. This choice belongs to them, but it should be noted that, as original works, prints are limited to 30 copies for photographs and 12 copies for art prints. An artist who markets his works live must know that beyond these quantities he becomes subject to VAT.

In the framework of the Digigraphy, it is possible to realize several series from the same visual since the latter is determined by its visual, its size and the medium on which it is printed.
